Wild Birds and Women in Contemporary Japanese Art
Introduction

Pictures of a wild bird or of a woman are common in Japanese art but pictures of a wild bird and a woman are much less common, except in contemporary Japanese art (i.e., 1950 to present day). Wild birds and women are not natural companions so why, then, would numerous contemporary Japanese artists choose to include a wild bird and a woman in the same picture? One possible explanation is that the contemporary philosophy of art champions novelty, one example of which is a picture of a wild bird and a woman. Twenty examples of contemporary wild bird and woman pictures, each drawn by a different Japanese artist, are included in this virtual exhibition. In pictures 1-13 the woman is fully clothed while in pictures 14-20 the woman is either naked or only partly clothed. For each picture, the following information is provided: names of the artist and bird (if known), title (if any), printing method and print size. These twenty prints are part of the Reader Collection of Japanese Art.
